ANNUAL REPORTS
OF THE
CHIEF ENGINEER OF THE FIRE DEPARTMENT,
CITY MARSHAL,
AND
SUPERINTENDENT OF THE ALMSHOUSE,
OF THE
CITY OF PORTSMOUTH,
FOR THE YEAR ENDING DECEMBER 31ST, 1860.

ANNUAL REPORT

OF THE

CHIEF ENGINEER OF THE FIRE DEPARTMENT.

To the Hon. Mayor and the City Council:

GENTLEMEN:—Our Fire Department continues to maintain the high reputation that it so justly deserves; and although some of the Engine Companies were reduced at the commencement of the year to half of their full compliment, in consequence of many of the old members declining to serve, thinking thereby to induce the city to increase their pay; yet the vacancies were soon filled by men, who were better fitted for the onerous duty of the fireman.

Our city has been exempt from any serious fire since the commencement of the year,—the fire at Mr. B. F. Webster's building being the most destructive. The Department has been called out the present year fifteen (15) times for the extinguishment of fires, and fourteen (14) times by false alarms. Since the arrest and imprisonment of Halfpenny, our city has had but few fires, and much credit is due to our watchmen for relieving us from so troublesome an individual. The Engines, Hose and other articles belonging to the Department are in most excellent order; with the exception of the carriage for the Hook & Ladder Co., which is totally unfit for the purpose for which it is designed, being so heavy and cumbersome that it is almost an impossibility for them, (even with a horse to drag it,) to arrive at a fire as soon as they are needed. In many cases ladders are required even before the engines, and then we are compelled to obtain them from the buildings in

the neighborhood, thus causing, in some instances, a delay which might be dangerous.

Therefore I would earnestly recommend that a new carriage be provided for the company, constructed on the plan now used in our large cities, light yet serviceable, so that in case of necessity it may be dragged with speed by hand if required.

Two hundred feet of Hose have been purchased by the Department during the present year, and both old and new hose have received a thorough oiling during the past month.

The deficiency of water at the west part of the city is the cause of much uneasiness to the owners of real estate in that portion of the city ; as in case of a fire in the vicinity of the Middle Street Church, there is no place to obtain water, but the Aqueduct stop near the house of Samuel Lord, Esq., that we can rely upon ; therefore it is again recommended that the long talked-of reservoir be built near Haymarket Square or in Court street.

The reservoir on Pleasant street has been put in good order at an expense of (\$450) four hundred and fifty dollars, and can now be depended upon for use.

The reservoir on Austin street is in a bad condition, being leaky, and needs a thorough repair to put it in an efficient state for dependence in case of fire.

The buildings appropriated for the use of the Department are all in good condition, with the exception of the one used by the Hook & Ladder Co., and that used by the Hose Co. : both of which are in a miserable condition, and unfit for the purposes for which they are used. The house occupied by the Hook & Ladder Co. especially is but a fire trap, and has been already the object of one incendiary attempt, during the absence of the company at another fire, and but for the opportune return of the company to the house in season to discover the fire and give the alarm, we should have witnessed, probably, the most disastrous fire we have had for many years.

It is also recommended that a Hose tower be placed on Engine House, No. 6, and that water be put into each of the Engine Houses early in the coming year, as the companies are now subjected to much inconvenience in obtaining water with which to wash their hose. An alarm bell is needed very much on Engine House, No. 5. It is also recommended that two canvas suits be furnished each company for the use of their pipemen at fires.

In closing I take the opportunity to say that the several companies on all occasions have been courteous to their officers, and prompt and energetic in the discharge of their duties. Much has been done by the City Government for the comfort and convenience of the Department of late, yet, much more remains to be done, in order to keep up a sufficient interest in this important branch of our City Government.

All of which is most respectfully submitted,

CHARLES E. MAIN,

Chief Engineer Portsmouth Fire Department.

Portsmouth, December 21, 1860.

Organization of the Fire Department, together with a Schedule of the Property of the Department, &c.

ANNUAL REPORT

OF THE

CITY MARSHAL.

CITY MARSHAL'S OFFICE, }
 Portsmouth, Dec. 31, 1860. }

To the Hon. Mayor and City Council:

GENTLEMEN—In accordance with City Ordinance I would most respectfully make the following report:

Whole number of Arrests made from Dec. 31, 1859, to date is 701, for the following causes:

Drunkenness	204	False alarm of fire	3
Vagrancy	92	Incendiaries	2
Lodging	163	Brawl and tumult	22
Disorderly conduct in street	29	Receiving stolen goods	1
Deserters from Almshouse	9	Riot	4
Suspicious persons	29	Throwing stones	1
Larceny	27	Sabbath breaking	4
Assault	43	Bathing in public places	4
Deserters	17	Breaking glass	3
Truancy	14	Incumbering sidewalk	28
Insane	1	Resisting officer	1

Respectfully submitted.

B. NORTON, *City Marshal.*

ANNUAL REPORT
OF THE
OVERSEERS OF THE POOR.

The Overseers of the Poor would respectfully report that the expenses for the support of the poor in the Almshouse, the past year, have not been so large as on some former years; the number of inmates on an average being less. The applications for out-door relief have not been so numerous as in some previous years. The able-bodied, idle vagrants, who are continually wandering about from place to place, and who prefer begging to honest labor, have had their present wants supplied, and started off to pursue their chosen occupation. The citizens should be careful not to encourage street begging by strangers, but refer them to our worthy City Missionary or to the Overseers of the Poor, and thereby prevent frequent impositions. The inmates of the House have been usually healthy the past season, and have been well cared for and kindly treated, by those having the immediate care and charge of them—consistent with good order and a proper system. The Farm has yielded good crops, which have been seasonably secured, in good condition; and the hay, which is the principal product, has been disposed of at satisfactory prices—so that the income of the Farm, the present year, will show a good result. That class of our unfortunate fellow beings, the Insane, are particularly entitled to our sympathy, and if any plan could be devised to better their condition it would be desirable.

Respectfully submitted.

Ward 1, JOHN HODGDON, 2D,	} <i>Overseers of the Poor.</i>
“ 2, WILLIAM BODGE,	
“ 3, SAMPSON B. LORD,	

ANNUAL REPORT

OF THE

SUPERINTENDENT OF THE CITY ALMSHOUSE.

To his Honor the Mayor and City Council :

GENTLEMEN—The Superintendent of the Almshouse respectfully begs leave to report, that the number of admissions to the House, including those who were present at the commencement of the year, is 182.

Number of deaths during the year	8
Number of insane during the year	16
Present number of insane	13
Number of idiots during the year	10
Average number of inmates during the year	66
Present number of inmates	65

of whom 3 are over 80, 8 between 70 and 80, 11 between 60 and 70, 12 between 50 and 60, 8 between 40 and 50, 11 between 30 and 40, 6 between 20 and 30, and 6 under 10 years of age.

The whole number of convicts committed to the House of Correction during the year is 21, 2 of whom paid cost of prosecution, 8 deserted. 8 were discharged by order of the Mayor and Overseers, and 3 whose time has not expired.

Respectfully submitted.

WILLIAM MOSES, *Superintendent.*

A D D R E S S
OF THE
HON. WILLIAM SIMES, MAYOR,
AT THE
ORGANIZATION OF THE CITY COUNCIL,
PORTSMOUTH, N. H., JANUARY 1st, 1861.

MAYOR'S ADDRESS.

Gentlemen of the City Council:—

We have assembled to-day in obedience to the wishes of our fellow-citizens, and in accordance with the requirements of our City Charter, to organize the municipal government for the ensuing year.

In the management of the business of the City, our constituents expect and will demand at our hands, a faithful, practical and economical administration of all things relating to the welfare and prosperity of the City.

We should not be influenced by any private or party consideration, but solely by an earnest desire for the public good; and, like faithful stewards, so discharge our duties that we may be able to render a satisfactory account of our stewardship.

We are entering upon a new year of the government of the City, and my predecessors having so fully and elaborately set forth the advantages and wants of the City, I will merely review in brief, the condition of the several departments, and submit to you such information as I have been able to acquire.

In regard to the finances of the City, it cannot be expected that I can give you an exact statement, but in a short time, a full and complete exposition of them will be published for the benefit of the citizens. The City debt at the close of the year 1859 was \$61,057.41. I find from a cursory examination of the accounts, for the past year, that they will proba-

bly exhibit a reduction of the debt about \$5000, consequently reducing the indebtedness of the City to about \$56,000; from which it would appear that a proper and just economy has with good judgment been used the past year in the expenses of the City, as far as they could be governed. On reflection upon our pecuniary affairs, I am led to the conclusion that a more concentrated power should be used to control the expenditures of some of the Departments of the City Government, and therefore, if in the expenditures of money for the wants of the City, our ordinances are not sufficiently explicit to give a proper supervision over them in the several departments, they should be altered or amended to meet the exigencies of the case.

A scientific survey of the Streets in the compact part of the City, has been lately made by Mr. Robert L. Harris of Boston, and has been pronounced by competent judges to have been done in a faithful and efficient manner. We may not find it advisable to make all the alterations in the streets, which the survey deems necessary, but I have no doubt that we may be able to derive from it much information and advantage valuable to the City, and that it will afford a permanent basis for grading our streets.

The roads surrounding the City, as usual, will require more or less expenditures on them; and past experience has shown that whatever repairs are required should be done as early as practicable in the Spring, and the appropriations be made early, in order that the labor demanded may be performed with economy.

They should always be kept in good order, to avoid any claims for damages or extra expenses which are liable to arise from neglect.

The extension of State to Cass Street has been made the past year, but as yet not accepted by the City.

I have visited the Alms House and am well satisfied with

its general condition ; and from the appearance of its inmates, should judge that they have had good care taken of them. are provided with comfortable apartments, and every thing calculated to make them cheerful and contented.

I am of the opinion, that, if pains were taken, we should find in the City many families more destitute of the comforts of life, than are the unfortunate poor at the Alms House. At this inclement season of the year, I cannot judge of the general condition of the farm connected with the Alms House, but the Superintendent has given, in his report, a statement of the income and expenditures for the past year. It is the impression of a portion of the public that the farm could be reduced in its extent, and thereby managed with greater efficiency and economy.

I believe that a smaller part of the farm, with the buildings thereon, under a high state of cultivation would produce as much profit and income to the City as the whole property has realized under its usual cultivation.

The farm has for years suffered great inconvenience and loss, from the want of a granary, vegetable cellar, and a suitable place for the storage of carts and farming utensils. In order to remedy this evil, I would suggest that an appropriation be made, for the purpose of erecting an addition to the western end of the barn, near the house, which would give all the room that would be necessary for the supply of these wants.

It has been in contemplation to have water introduced into the house, from a valuable spring near it, which would be a great saving of labor, as well as a very great convenience, and extremely useful in case of fire. I would recommend that this be done as soon as possible.

Our Public Schools deserve, and should receive, a generous and hearty support. The appropriations for them heretofore

have been liberal, and whatever their best interests require should be cheerfully granted.

I know of no better or more equal distribution of the public fund than in the expenditure for schools; believing, as I sincerely do, that the safety and perpetuity of our free institutions, depend in a great measure upon the education of the people.

The schools have deservedly maintained a high character, owing to the judicious management of our school committees and teachers; for however liberal the appropriations may be, they avail but little without judicious management on the part of those to whom they are entrusted. In this connection, I would suggest for your consideration, whether some measure cannot be adopted for checking a growing evil, daily increasing in our midst—that of truancy.

During the past year a new School-house has been erected in Cabot Street, which is a credit to our City, both as regards appearance and convenience.

It is an established fact that in order to maintain peace, protect property and provide for the faithful execution of our laws, there should be an active and vigilant police force, and the persons composing it should be men of good standing, thorough in their duty, and exercising their authority in a conciliatory manner.

Yet, however thoroughly conversant with their duties, and however faithful in their execution of them, it is essential to the good order of the city, that they should receive the sympathy and encouragement of the community.

The Fire Department, so important in a City like ours composed mostly of wooden buildings, I am informed by the Chief Engineer, is in good order for prompt and active service.

Its greatest need at this time is a sufficient supply of water, which can be obtained by a reservoir placed in some suitable part of the City.

Whenever it becomes necessary to purchase a new engine or to make any extensive repairs, I would recommend for your consideration, the purchase of a steam fire engine. Such engines are used in most large cities with great advantage over the common hand-engine, are managed with less expense, accomplish more work, and more effectually check the devastations of fire.

Gentlemen,—I have adverted to many subjects of municipal interest that will claim your attention, and undoubtedly there will be many others offered for your consideration.

In the performance of the duties of the office to which I have been elected, you are well aware that my experience has been limited, and in consequence thereof I shall rely upon your assistance and co-operation. I am gratified to see in our council some of the former members; may such return to their duties with renewed zeal, bringing to bear upon our deliberations the light of past experience; may a spirit of courtesy and harmony, actuate us in all our relations, and may the blessing of Heaven crown our labors.

r
